

Smoke Detector Program / Residential Lock Box

Smoke alarms save lives. Smoke alarms that are properly installed and maintained play a vital role in reducing fire deaths and injuries. If there is a fire in your home, smoke spreads fast and you need smoke alarms to give you time to get out.

Here's what you need to know!

- A closed door may slow the spread of smoke, heat and fire. Install smoke alarms in every sleeping room and outside each separate sleeping area. Install alarms on every level of the home.
- Smoke alarms should be interconnected. When one sounds, they all sound.
- Large homes may need extra smoke alarms.
- Test your smoke alarms at least once a month. Press the test button to be sure the alarm is working.
- Today's smoke alarms will be more technologically advanced to respond to a multitude of fire conditions, yet mitigate false alarms.
- When a smoke alarm sounds, get outside and stay outside.
- Replace all smoke alarms in your home every 10 years.

Trusted by thousands of fire and law enforcement agencies for over 40 years, Knox Rapid Access Solutions have provided first responders with immediate access into secure buildings, campuses, residences and commercial properties when it matters most. Removing barriers to entry reduces injuries to responders and minimizes property damage. That's the power of the Knox rapid access system.
